Initiate an eConsult to the Ontario eConsult Service directly from your EMR via Ocean

The [Ontario eServices Program](#) and our partners at [Ontario Health](#) and [Ocean by CognisantMD](#) are excited to announce a **new integration** which enables clinicians to **send eConsults** to the Ontario eConsult Service on the OTNhub.ca **directly from their integrated EMR via Ocean**.

The "Ontario eConsult Service" is now available on the [OceanHealthmap](#) allowing clinicians to initiate an eConsult using Ocean to submit through to the OTNhub.

This streamlined workflow allows clinicians to submit eConsults *easily, quickly, and independently* using the same efficient and reliable EMR integrated workflow they already use for sending Ocean eReferrals. This workflow will:

- enhance patient safety and accuracy of information by enabling the seamless flow of patient information and attachments
- save the clinician time and significantly reduce the overall transcription effort

Note: receiving your eConsult response from the specialist, and any additional correspondence, will still occur directly on the OTNhub web platform. Furthermore, delegates cannot send eConsults on behalf of a clinician using this integration.

"This [workflow] removes an enormous amount of friction by eliminating the need to enter a patient's demographic information into a new referral form and brings us closer to a fully integrated product. Accessing eConsult and eReferral [through] Ocean has improved my process for interacting with specialists."
- Dr. Daniel Pepe, Primary Care Clinician, London, ON
