

eConsult - Celebrating 15 Years!

"From a cup of coffee to an evolutionary solution, resulting in over 600k provider-to-provider eConsults, reduced patient wait times, and eliminating unnecessary referrals. The eConsult service started with a handful of regional clinicians and grew into a hugely successful provincial service, connecting primary care clinicians and specialists to receive advice for the treatment of their patients in over 135 different specialties across Ontario.

We are so excited to be celebrating 15 years of leadership, research and partnership, sharing our learnings to support the enhancements, expansion & accessibility of the eConsult service for so many clinicians, provincewide, and we are thrilled to see eConsult expanding to other parts of Canada, as well as internationally."
