

## Setting Priority Regions

**Note:** This setting is available only to requesting providers. Delegates of requesting providers cannot set the priority regions for their providers.

Priority Regions identify specific areas that offer BASE Managed Specialty Groups, where you can send an eConsult request to a group of specialists whose cases are managed by an assigner, thus increasing the odds of getting immediate access to specialty resources.

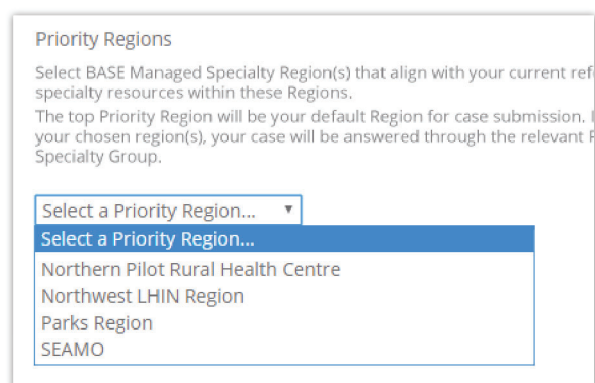

If you do not select a priority region, or if there is no specialty group in your chosen region(s), cases are answered through the relevant Provincial Managed Specialty Group.

- To identify a Priority Region, click the **Select a Priority Region** drop-down arrow and click a name in the list.
  - The selected region appears below the selection field.
  - The first region selected is given a Priority of 1. Each additional region selected defaults with a sequence number one more than the previously selected region.
  - Each priority must be unique. That is, there can be only one priority 1, one priority 2, etc.
- To change a selected region's priority, click its associated **Priority** drop-down arrow and select a number.
- To delete a selected region, click its associated  **Action** button.
- If you change your mind, you can cancel at any time.
 

To cancel any edits you have made in the settings, simply go to any other page in OTNhub and the changes will not be saved.
- To submit the new settings, click .
 

If all is okay, the **Settings** screen reloads and a success message appears.

If there is an error, an error message appears. Correct the error and try again.
