

Setting Priority Regions on the OTNhub

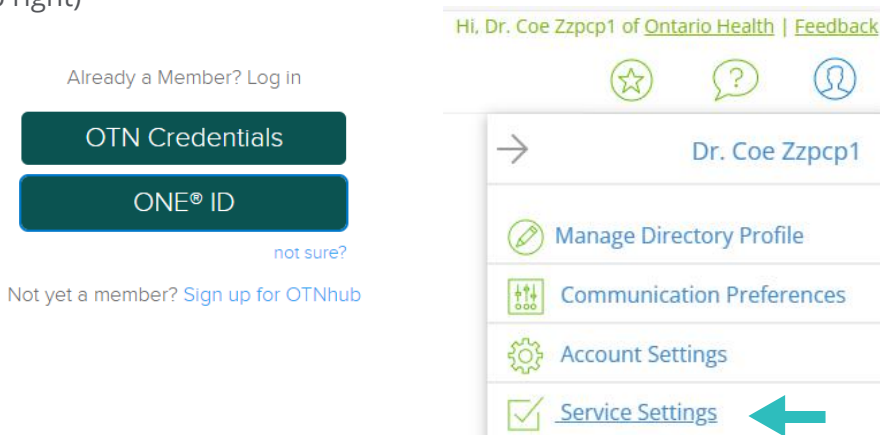

Hosted on the secure-web based OTNhub platform, **Ontario eConsult** is a digital health tool that allows clinicians, nurse practitioners and midwives timely access to specialist advice for patient-specific inquiries and often eliminates the need for an in-person specialist visit.

Before You Start:

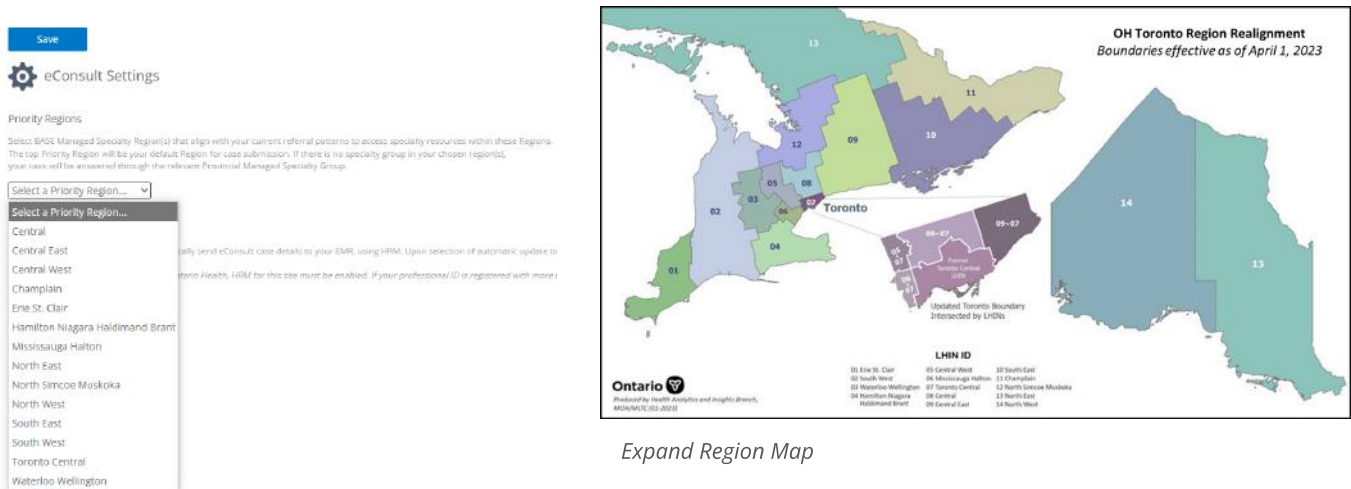

- To send an eConsult, clinician senders (and their delegates) must have an **OTNhub account** set up with either **ONEID** or **OTN credentials**.
- Clinicians using eConsult may have their BASE™ Managed case directed to a **participating specialist within their region**, rather than a provincial group by **setting their priority regions on the OTNhub**. Cases will be directed to Regional BASE™ Managed groups, where available.
- Cases sent using the BASE™ Managed Specialty model will be automatically directed to the Provincial BASE™ Managed groups where no Regional BASE™ Group exists.

Setting Your Priority Regions

1) Sign on to OTNhub.ca with ONEID or OTN Credentials and click **"Service Settings"** from the User Panel (top right)

2) Select the desired region(s) by clicking on **"Select a Priority Region"** dropdown - rank as desired - then click **"Save"**.

Expand Region Map

To review eligibility and to get started, please review our [Signing Up for an OTNhub Account 1-pager](#) or connect with an eConsult team member by filling out our [intake form](#).

To learn how to submit an eConsult case on the OTNhub, see our [user guide](#) or watch our [video](#).
